Administration Officer
Whangamata Community Board
Thames Coromandel District Council
P O Box 34
WHANGAMATA

Attention: Mr John Whittle

Dear Sir,

WHANGAMATA HARBOUR HYDRAULICS STUDY

We understand through discussion with Councillor Bruce Scott that Council will shortly be commissioning a hydraulics study of Whangamata Harbour with the view to assessing dredged channel improvements and to investigate the feasibility of constructing a marina. We wish to register interest in carrying out the study and would be pleased to respond to Council's brief as soon as it becomes available.

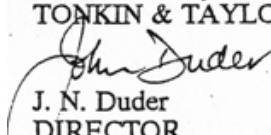

Tonkin & Taylor Ltd is a multidisciplinary civil engineering consultancy specialising in the complementary fields of geotechnical, water resource, environmental and civil engineering. The firm's expertise includes investigations and feasibility studies through to design, implementation and monitoring for geotechnical and water related projects in the fields of coastal engineering (including coastal studies), water supply, irrigation, drainage, roading, river control and sewerage, and is already known to Council staff.

We enclose a copy of our company brochure together with our Coastal and Marine Engineering Capability statement to demonstrate our project experience and staff capability.

In addition to projects identified in the capability statement, Tonkin & Taylor Ltd have recently completed a study of sedimentation and littoral processes at Mangawhai-Pakiri Beach, and are currently investigating coastal hydraulics at Orewa Beach, including terminal groyne extension and beach nourishment, and foreshore stability at Papamoa and on the Tamaki River.

We will be pleased to provide Council with a detailed proposal and statement of capability in accordance with Council's brief. Please make initial contact regarding this to the writer or Mr Grant Pearce.

Yours faithfully
TONKIN & TAYLOR LTD

J. N. Duder

Whangamata Community board meeting 1st march 1993

8.12.Tonkin & Taylor
15/10/40/03

The Board received a letter from the Director of Tonkin & Taylor registering their interest in a Whangamata Harbour Hydraulic Study to access channel improvements and the feasibility of constructing a marina.

Resolved that Board Members Scott in liaison with the Special Projects Engineer and Area Engineer prepare a tender brief for the Harbour Study. The brief is to be brought back to the Board prior to tendering.

Scott/Grant
